

## Farmer Education Programs

Supported By:

As part of the Skill Enhancement and Digital Literacy for the Rural Youth and Farmers, we have undertaken various awareness and training programs at the Village Panchayat level

The main mission of this exercise is to create awareness about vast data and information available in the online media and how to access the same for the betterment of the farmer community, especially the market prices and its fluctuations on a day today basis, so that the farmer is well aware of the current price for any commodity and he is not cheated by the middlemen or the dealer.
