

Organic Farming Initiatives in Ghana Africa

Supported By:

Undertook Organic Farming training for the farmers in Ghana, Africa, focusing on preparation and use of Organic Inputs, Certifications aspects, preparation and use of Natural Pesticides, etc., along with partner organisations.

Launched Organic Inputs from Prathista Industries to benefit the Organic Farming movement in the country

Helped developing local capacities in community waste management to prevent waste burning and reduction and control of POPs pesticide, focusing on POPs alternatives and organic models directly benefitting 7,000 people in Africa, along with partner organisations.

Partnered with Salvation Aid for Africa (SAAFAID) and trained their executives and officials on the Organic Farming techniques in India, to become Champions back in Ghana.

Also helped in formation of Farmer Groups under the program to impart the training to fellow farmers in other regions of Ghana.

Organic Farming Initiatives in Ghana, Africa Launch of Organic Inputs
